The Journal of General Psychology, 121(4), 405–407

Index to Volume 121

This annual index is organized by first author and by title. Page numbers refer to the following issues:

Number 1 (January): 1–96
Number 2 (April): 97–184
Number 3 (July): 185–296
Number 4 (October): 297–408

AUTHOR INDEX

Das, J. P., Mok, M., & Mishra, R. K. *The role of speech processes and memory in reading disability.* 131–146.

Dittmar, M. L. *Proficiency and workload in simultaneous and successive proofreading tasks.* 319–332.

Drose, G. S., & Allen, G. L. *The role of visual imagery in the retention of information from sentences.* 37–60.

Geer, J. H., Judice, S., & Jackson, S. *Reading times for erotic material: The pause to reflect.* 345–352.

Goernert, P. N., & Larson, M. E. *The initiation and release of retrieval inhibition.* 61–66.

Hatta, T., & Kawakami, A. *Cohort effects in the lateral preference of Japanese people.* 370–380.

Heathcote, D., Walker, P., & Hitch, G. J. *Feature independence and the recovery of feature conjunctions.* 253–266.

Itakura, S. *Cutaneous pattern perception on foreheads in 3- and 4-year-old children.* 101–109.

Itakura, S. *Recognition of line-drawing representations by a chimpanzee (Pan troglodytes).* 189–197.

Jinfu, Z., & Xiaolin, L. *Discovery and a preliminary study of the parallel lines illusion change effect.* 311–317.

Lippman, L. G. *Rule-governed performance and sensitivity to contingencies: What's new?* 353–360.

Lynn, R., & Owen, K. *Spearman's hypothesis and test score differences between Whites, Indians, and Blacks in South Africa.* 27–36.

McGraw, K. O., & Stanford, J. *The apparent distance of interior and exterior corners: A test of Gregory's misapplied size constancy explanation for the Mueller–Lyer illusion.* 19–26.

McKelvie, S. J. *Is memory for head orientation based on a left-looking schema?* 209–225.

McKelvie, S. J., Sano, E. K., & Stout, D. *Effects of colored separate and interactive pictures on cued recall.* 241–251.

Nagae, S. *Handedness and cerebral hemispheric differences in memory for pictorial organization.* 227–240.

Perz, S. G., & Purdy, J. E. *Optimal foraging by patch and prey selection in* Thamnophis sirtalis similis. 121–130.

Reinhardt-Rutland, A. H. *Radial aftereffect of induced motion (IMAE): Perception during monocular viewing with minimal background pattern.* 403–404.

Scharroo, J., Stalmeier, P. F. M., & Boselie, F. *Visual search and segregation as a function of display complexity.* 5–18.

Schneider, K., & Pinnow, M. *Olfactory and gustatory stimuli in food-aversion learning of rats.* 169–183.

Silverglade, L., Tosi, D. J., Wise, P. S., & D'Costa, A. *Irrational beliefs and emotionality in adolescents with and without bronchial asthma.* 199–207.

Singh, T., & Dwivedi, C. B. *The relation of text structure to context processing during reading.* 157–168.

Smither, J. A., & Braun, C. C. *Technology and older adults: Factors affecting the adoption of automatic teller machines.* 381–389.

Stegge, H., Meerum Terwogt, M., & Koops, W. *Positive and negative mood effects in children: The mediating influence of task characteristics.* 333–344.

Terry, W. S., Fore, S., & Haase, J. L. *Extraversion, neuroticism, and face–name learning.* 301–310.

Turner, M. L., Schwartz, M. K., Clifton, G. E., & Engle, R. W. *Effects of vocabulary size and acoustic similarity on serial recall of mouthed stimuli.* 361–376.

Ulasevich, A., & Rychlak, J. F. *The heuristic power of oppositionality within and between paired-associate units.* 267–281.

Vidal, J., & Rama, R. *Behavior and the antibody response as differential traits in three Murine inbred strains (DBA/2, BALB/c, C57BL/6).* 85–93.

Weisman, A. M., & Taylor, S. P. *Effect of alcohol and risk of physical harm on human physical aggression.* 67–76.

Wenxi, C. *A mathematical approach to difference limen.* 283–293.

Wilson, C., & Kaspar, A. *Changes in immobility responses in rat pups with maternal stimuli.* 111–120.

Wilson, C., Koontz, D., & Seymour, T. *Effects of haloperidol and propranolol on rats' transport response to maternal stimuli.* 147–156.

Zimmerman, D. W. *A note on the* F *test for equal variances under violation of random sampling.* 77–83.

Zimmerman, D. W. *A note on the influence of outliers on parametric and nonparametric tests.* 391–401.

TITLE INDEX

The apparent distance of interior and exterior corners: A test of Gregory's misapplied size constancy explanation for the Mueller–Lyer illusion. *Kenneth O. McGraw & John Stanford.* 19–26.

Behavior and the antibody response as differential traits in three Murine inbred strains (DBA/2, BALB/c, C57BL/6). *José Vidal & Ramon Rama.* 85–93.

Changes in immobility responses in rat pups with maternal stimuli. *Christopher Wilson & Amy Kaspar.* 111–120.

Cohort effects in the lateral preference of Japanese people. *Takeshi Hatta & Ayako Kawakami.* 370–380.

Cutaneous pattern perception on foreheads in 3- and 4-year-old children. *Shoji Itakura.* 101–109.

Discovery and a preliminary study of the parallel lines illusion change effect. *Zhang Jinfu & Liu Xiaolin.* 311–317.

Effect of alcohol and risk of physical harm on human physical aggression. *Adam W. Weisman & Stuart P. Taylor.* 67–76.

Effects of colored separate and interactive pictures on cued recall. *Stuart J. McKelvie, Elaine K. Sano, & Dale Stout.* 241–251.

Effects of haloperidol and propranolol on rats' transport response to maternal stimuli. *Christopher Wilson, Dawn Koontz, & Tarina Seymour.* 147–156.

Effects of vocabulary size and acoustic similarity on serial recall of mouthed

stimuli. *Marilyn L. Turner, Marci K. Schwartz, Genell E. Clifton, & Randall W. Engle.* 361–376.

Extraversion, neuroticism, and face–name learning. *W. Scott Terry, Susan Fore, & Jennifer L. Haase.* 301–310.

Feature independence and the recovery of feature conjunctions. *David Heathcote, Peter Walker, & Graham Hitch.* 253–266.

Handedness and cerebral hemispheric differences in memory for pictorial organization. *Seiji Nagae.* 227–240.

The heuristic power of oppositionality within and between paired-associate units. *Alec Ulasevich & Joseph F. Rychlak.* 267–281.

The initiation and release of retrieval inhibition. *Phillip N. Goernert & Michael E. Larson.* 61–66.

Irrational beliefs and emotionality in adolescents with and without bronchial asthma. *Laura Silverglade, Donald J. Tosi, Pamela Sharrett Wise, & Ayres D'Costa.* 199–207.

Is memory for head orientation based on a left-looking schema? *Stuart J. McKelvie.* 209–225.

A mathematical approach to difference limen. *Chen Wenxi.* 283–293.

A note on the *F* test for equal variances under violation of random sampling. *Donald W. Zimmerman.* 77–83.

A note on the influence of outliers on parametric and nonparametric tests. *Donald W. Zimmerman.* 391–401.

Olfactory and gustatory stimuli in food-aversion learning of rats. *Klaus Schneider & Marlies Pinnow.* 169–183.

Optimal foraging by patch and prey selection in *Thamnophis sirtalis similis. Stephen G. Perz & Jesse E. Purdy.* 121–130.

Positive and negative mood effects in children: The mediating influence of task characteristics. *Hedy Stegge, Mark Meerum Terwogt, & Willem Koops.* 333–344.

Proficiency and workload in simultaneous and successive proofreading tasks. *Mary Lynne Dittmar.* 319–332.

Radial aftereffect of induced motion (IMAE): Perception during monocular viewing with minimal background pattern. *A. H. Reinhardt-Rutland.* 403–404.

Reading times for erotic material: The pause to reflect. *James H. Geer, Sandra Judice, & Sheryl Jackson.* 345–352.

Recognition of line-drawing representations by a chimpanzee (*Pan troglodytes*). *Shoji Itakura.* 189–197.

The relation of text structure to context processing during reading. *Tara Singh & C. B. Dwivedi.* 157–168.

The role of speech processes and memory in reading disability. *J. P. Das, Marion Mok, & Rama K. Mishra.* 131–146.

The role of visual imagery in the retention of information from sentences. *Gerald S. Drose & Gary L. Allen.* 37–60.

Rule-governed performance and sensitivity to contingencies: What's new? *Louis G. Lippman.* 353–360.

Spearman's hypothesis and test score differences between Whites, Indians, and Blacks in South Africa. *Richard Lynn & Kenneth Owen.* 27–36.

Technology and older adults: Factors affecting the adoption of automatic teller machines. *Janan Al-Awar Smither & Curt C. Braun.* 381–389.

Visual search and segregation as a function of display complexity. *Jackie Scharroo, Peep F. M. Stalmeier, & Frans Boselie.* 5–18.
